sam Sport® – pain relief without meds – hosts exhibit at Major League Soccer meeting Jan. 8-9

ZetrOZ Systems LLC, makers of **sam Sport®** – a wearable, active ultrasound medical device to speed up healing and reduce pain for injuries – will be an exhibitor at the Major League Soccer Club Administrators Meeting, Jan. 8-9 at the Manhattan Beach Marriott, Manhattan Beach, California.

What is **sam Sport**?

It is sustained acoustic medicine. Think pain relief without meds.

sam Sport is an ultrasound device clinically proven and FDA-cleared to enhance tissue recovery, accelerate the body's natural healing processes and relieve pain. Adhere it to the body in a specific place, as it uses proprietary miniaturization technology to provide ultrasonic waves that penetrate five centimeters into tissue to increase circulation, oxygen and nutrient delivery, and it removes waste products, such as lactic acid, from the site of a musculoskeletal injury.

Common professional soccer injuries treated with **sam Sport** include hamstring strain, groin pull or strain, back pain/spasms, chronic lateral/medial epicondylitis (elbow), shoulder tendinitis, Carpal Tunnel Syndrome, plantar fasciitis and medial collateral ligament sprain or tear.

“I have used the device (**sam Sport**) on so many things,” said Rick Guter, head trainer for the U.S. Women’s National Team. He has applied the ultrasound device for injuries such as chronic abductor tendinitis and acute mid-foot strain/contusion. By using it in an afternoon for a mid-foot strain, the player walked pain free the next day.

Guter recounted in Brazil last summer where a player awoke with severe groin pain. The trainers applied **sam Sport**, held the player from the evening game, conducted a light workout the next day and applied **sam Sport** again. “[The player] was available for our next game a day later,” he said.

Currently 5 Major League Soccer teams use **sam Sport**, as well as 16 NFL teams, 10 NHL teams, USA Cycling, U.S. Figure Skating and Rugby Canada. Six Major League Baseball teams use it, and Sam Sport signed its 18th NBA team on Jan. 3.
